## Sheriff Benefits from Early Screening

**Tallahassee** - Sheriff Larry Campbell recently underwent surgery after a routine physical detected a spot on his lung. Because of the early intervention, surgeons were able to eradicate the growth and Campbell is expected to make a full recovery within a few weeks.

To avoid any rumor or speculation that may arise as a result of the procedure, Campbell wanted to let the community know that the potential problem was caught before it manifested into a more serious health issue.

Campbell said "I can not impress upon you just how important a yearly physical is to your health. Because of regular screenings I have stayed ahead of potential health problems, and in this case, caught a possible life changing issue and stopped it in its tracks".
